

## **Report on Testing of AMwand and Pendant (Amized Fusion Technology devices) by Amega Global**

### **Biopulsar SR5 Reflexograph**

**February 25<sup>th</sup>, 2010**

#### **General Description:**

The AMwand (manufactured by Amega Global) is a device containing *AMized Fusion Technology (AFT)*, a proprietary name referring to the wands emitting a beam of *zero point field energy* resonance.

A human electromagnetic field analysis was done using a Biopulsar SR5 Reflexograph. This equipment consists of a plate with numerous pressure points that the subject presses his hand against. A computer receives energetic pulses from the person's hand, corresponding to different organs and systems. The computer translates their different vibrational frequencies into colour codes which are superposed over a human image, indicating the state of health of the subject. For this test, a second reading of the volunteer's electromagnetic field was taken after he was exposed to AFT. It showed clearly positive changes.

This tool is well-known in Europe, especially Germany, where allopathic medical doctors use it to gather information about a new patient prior to the clinical interview and examination. In North America, it is better known by alternative health practitioners working with energetic and natural approaches to health.

#### **Subjects and Witnesses Present during the Testing:**

An experienced practitioner operating the equipment, a volunteer whose electromagnetic field was analyzed before and after the application of AFT, three people applying the energy, and a cameraman filming the session were all present in the room.

#### **Procedure and Results:**

An initial hand reading was taken from our volunteer as a baseline. The image corresponding to this first scan can be found at the back of this report under the title **Electromagnetic Field (before) - BIOPULSAR**. This image shows several concerns in the energy of the subject, including lack of vitality in his chest area, indicated by the colour grey. The excessive colour yellow was interpreted by the practitioner as an indication of high mental activity correlated to stress.

Next, the volunteer received the application of AFT with 3 wands for 3 minutes. The areas of application were above his head, on the palm of his left hand, and over his abdomen. The subject also wore an Amega Global pendant with AFT around his neck.

Following, a second hand reading was taken from the volunteer.

The image corresponding to the second scan can be found at the back of this report under the title **Electromagnetic Field (after) - BIOPULSAR**. This image shows that after only 3 minutes of application of AFT, the subject's energy field has changed completely. The colour coding indicates healthy vitality in his chest area (corresponding to red, pink, and indigo). There is a decreased presence of the colour yellow (corresponding to more balanced mental activity and less tension). There is also a large presence of the colours green, indicating calmness in the energy field, and of the colour indigo, indicating an increase in higher psychological processes associated with balance and wellbeing.

### **Discussion:**

As the before and after images show, the images of our volunteer's electromagnetic field rapidly increased in healthy appearance after only 3 minutes of application of AMized Fusion Technology (as interpreted by those trained in the Biopulsar SR5 Reflexograph system).

These results appear to support Amega Global's explanation that the AMwand and other AMized Fusion Technology products can rapidly energize the human electromagnetic field and body (as well as all other organic matter) to promote health. It is hypothesized that the supply of the frequencies contained in AFT to the organism in this manner induces a state of homeostasis, or balance. This is what triggers the natural self-healing mechanism of each individual to produce the changes necessary for cellular and/or energetic repair and improvement.

There appears to be a strong correlation between this process and the experiential results observed by many during the live demonstrations being organized by the company's independent distributors to show the effects that this technology has on immediate pain relief, increase in strength and flexibility, and the positive changes detected in the taste of food, water, wine, etc.
